Supplying Canadian news and entertainment to the Dominion's troop overseas is one of the current responsibilities of CBC's rambling reporter, Gerry Wilmet.

LONG YEARS AGO

A children's day will be held at the Builders' Hardware on Saturday, December 17, and each child visiting the store will receive a bag of nuts.

Colin McPherson held an auction sale of his household effects to raise a broken leg which received when a horse ran him over to leave shortly to live in the East.

We are sorry to report that Mr. J. C. Reed is in the Holy Cross Hospital, Calgary, suffering from a broken leg which received when a horse ran him over to leave shortly to live in the East.

On Monday afternoon a free piano treat and lecture show will be held in the Farmers' Exchange Hall at 3:00 p.m., and every child in the district is asked to be there. This treat is given by the Farmers' Exchange, Farmers' Exchange, and the show will be Tom Mix in "My Pal the King".

Miss Vera Foxon held a Missions' sale on Wednesday evening last at the home of Mr. and Mrs. L. Paxon, in honor of Miss Helen Smith, whose marriage to Mr. Harley Davidson takes place on Dec. 15. The money was spent in games and contests, and Miss Smith was the recipient of many beautiful and useful gifts.

In The Good Old Days

Monday was wash day

Ladies were bustles

Nobody swatted the fly

There were no flappers

Nobody had appendicitis

There was no traffic cop

Everybody played croquet

There were no Bolsheviks

Men sported wiry whiskers.

Nobody worked but father

Ice cream was "iced" cream

Nobody was salaried or wage

Babies were born at home

Saturday night was bath night

No one was fined for speeding

Vitamin guages were unknown

Milk shake was a popular drink

It took a girl two days to get ready for a party; now she is ready any time.

The hired man got a dollar a day for "steep hours" — and earned it, too.

Ladies' clubs were the Ladies Aid, Sewing Circle and rolling pin.

Young people turned in at 9 p.m., now they turn in and don't turn until the next morning.

There were no crooners, but mother when she rocked her restless baby to sleep.

You often heard of "The boy and the bride", but that's where you'll usually find mother nowadays.

A man went to see his doctor about a pain in his back, which had been troubling him since morning. The doctor gave him the once over and in a few seconds the pain vanished.

"That's quick work doctor," exclaimed the pleased patient, "but it rheumatism."

"Not with the reply, "Your suspenders were twisted".

Educational Rehabilitation

The Alberta Department of Education has arranged in co-operation with the Federal Department of Labor to establish special schools for ex-service personnel who desire to continue their matriculation for university entrance or other educational training. The first of these schools will be open in Edmonton on January 2nd, 1945.

Ex-service personnel desiring to enter this school should write without delay to Mr. O. P. Thomas, 1125 10th Street, Edmonton, for particulars and advice. With the first letter an applicant should give particulars as to length of service, place and time of last discharge, age and course which applicant desires to enter at University.

This school is part of the Federal Plan for educational rehabilitation of ex-service personnel and will be conducted in such a way as to enable those attending to complete their high school work in the shortest possible time.

The University of Alberta is planning to establish for ex-service personnel in year 1945, courses comparable to the work of the first university year and senior matriculation. It is intended to enable students now eligible to enter university to complete the first year before the opening of the University session in September, 1945.

Those interested should immediately write to the Registrar of the University of Alberta, Edmonton, giving the following information:

1. Age and length of service
2. Time when and place where last high school examination written
3. The course to which admission is sought.

The World of Wheat

By H. G. L. Strange

We hear a good deal these days about the necessity for unity, whatever that may mean, and some people even talk about disunity when they succeed in getting together the people of all different racial origins, which make up our population of Canada.

My own experience of twenty years in the West of Canada has not caused me to doubt the disunity that people talk about. In almost every district on the prairies there are people of different nationalities, all working together in the usual friendly and good neighborly and as good Canadians. How, I ask, can people be called disunited if they work, visit, shop, eat and drink together, together as friends, and whose children all regard themselves as Canadians!

Those who talk of disunity seem to remember one thing, there is no disunity with our sons now in battle. Canadian lads of every racial group are doing their full patriotic duty, side by side, on the same side, fighting for the freedom of our country, of Canada. Is it not reasonable to assume that the national mind, made up of the various characters and ancestry of the many races living in Canada, has been firmly cemented for all time by the blood of our sons who have made, and will make, the supreme sacrifice!

"Can any one in the class give me a more elegant rendering of 'the sun rises'?"

"The book gets out of bed!"

Barber (to apprentice) "How is it your hands are so dirty?"

"The book gets out of bed!"

The Pick of Tobacco

The Mining Industry

DURING THE WAR YEARS there has been a great reduction in the production of metal articles for civilian use. This is understandable and light metals, especially aluminum, are in great demand for aircraft and military equipment. Canada is now the largest metal exporting country in the world, and as such, has been able to make an outstanding contribution to the war program of the United Nations. Aluminum, copper and nickel are among the many metals that are of the utmost importance in war and Canada's production of these metals is second to none. The manufacture of aircrafts is also found here, and the development of its production has been one of the outstanding achievements of our war effort. Mercury production is another wartime development of note. Canada has opened the only large mercury mine in the British Empire. Since 1942, this mine has supplied all our own needs, and provided enough for export to Britain and the United States. *

Supply Exceeds Normal Demand

Canada's metal supply is considerably in excess of her normal needs, but some indication of the demand for certain metals during the past few years, is demonstrated in figures given for the export of certain metals for war purposes. These figures show that at the outbreak of war, Canada contracted to send more than 1,000,000,000 pounds of aluminum, copper, zinc, nickel and lead alone to the United Kingdom. This was followed by an increase in the amount of aluminum exported in the Pacific and the United States entered the conflict. While the great volume of these exports has undoubtedly considerably depleted Canada's mineral wealth, there are indications that there still vast deposits here which give promise of great development in the future. Many of these deposits are in the areas known as the North West, and it is likely that there will be numerous opportunities for the opening of new mines, to replace some of those now exhausted by the demands of war. *

Future Growth Is Important In recent years interest in the development of new mining areas in Canada has been limited. The Canadian Institute of Mining and Metallurgy presented a report to the Advisory Committee on Reconstruction, showing the dates on which mines now in use, were discovered. This report revealed that 63 per cent. of the mines now in operation were opened before 1910; 11 per cent. between 1910 and 1920; 21 per cent. between 1920 and 1930; and 11 per cent. since 1930. Modern methods of prospecting and detecting deposits have made it possible for trained geologists and trained geologists, using electrical detecting devices, now locate new mine sites with speed and accuracy. Much of Canada's hope for the future lies in the continued expansion of the mining industry, which before the war gave employment to 107,000 people and contributed indirectly to the support of 1,200,000, or one-tenth of the total population.

Sherman Outclassed

Milk Heals Wounds

Allied Troops Have Praise For Germany's Royal Tiger Gun Many officers and men in the Second Army Division in Germany believe Germany's new "Royal" or "King" tiger tank with its "super-8" gun is the best tank in battle today. Our Shermans are all right in their class, but they are out-classed," is the way the men put it.

At least 23 Royal Tigers have been knocked out on this front, but the men who say it is a question of a lucky shot at simple tanks destroy them with other tanks or tank destroyers.

The new Royal Tiger weighs but two tons, or 72 tons, has a top speed of about 20 miles an hour, and its six inches of armor in front will turn Ailed 75 and 76 mm shells at ordinary distances. Armor on the side is twice as thick as that on the back three to four inches thick. It has a new super velocity 88-mm. gun with a shell almost a foot longer than any previously used. The barrel of the gun is more than 21 feet long.

Bamboo Cane

It Now Is Grown In England And Scotland

All around Britain a strange harness is being gathered—a harvested crop of bamboo cane. Before the war, only Cornwall grew this crop, but through the dying off of supplies from China and Japan the strong British cane has become increasingly important. Its strength is the main reason why bamboo cane is indispensable for the support of heavy fruit crops. There are bamboo groves in every nook of Scotland where some of the finest cane grows. The cane dealers (usually also growers) will travel to any part of the British Isles to buy the whole grove outright, however, for the purpose of crop supports. Bundles of 100 carefully graded canes are tied on a special bundling machine, a rack with a strong foot pedal, which ropes them together.

Beechwood, the musical masterpiece, showed signs of deafness at 28.

Price Control And Rationing Information

Q.—Must I turn my ration book in when I am leaving to take up six months residence in the U.S.A.?

A.—Yes. Anyone leaving Canada for a period of 60 days or more in his ration book to a branch of the Ration Administration and on his return, he must present the book or he will be given a ration book.

Q.—My family prefer commercially packed cranberry sauce to the cranberries I prepare. How many preserves coupons do I get for each jar?

A.—One preserves coupon must be surrendered for every 12 ounces of cranberry sauce.

Q.—I understand that applications to local ration boards for ration books for babies may be filled in at home, but what about evaporated milk?

A.—Yes. On the same time as application for a newborn baby's ration book is signed at a hospital, a request may be made for an evaporated milk card. It is provided that the formula requires evaporated milk. And remember that you will need a ration book for the baby until the name is registered.

Q.—I have a lot to say about the price control of Standards division of the War-time Prices and Trade Board. I have a ration book for babies which does not work well, do I send it in to Ottawa?

A.—The first thing to do is to return it to the store from which you purchased it. This store may satisfy your complaint, but if it is not satisfactory, send it with the bill of purchase, the label from the garment, the name of the manufacturer or number or the manufacturer's mark. If you are not able to send the bill of purchase, the label from the garment, the name of the manufacturer or number or the manufacturer's mark, then write to the Standards division in Ottawa.

Please send your questions or requests for pamphlets "Consumer News" or the Blue Book in which you keep track of your consumption. Send them to the War-time Prices and Trade Board office in your province.

War Brides

An Immigration Movement Of Considerable Importance To Canada

In spite of the number of war brides already in the country, children remain in Britain, and from 400 to 500 British girls are each month being brought to Canada.

This is an immigration movement of considerable dimensions. All of these newcomers to Canada whenever they arrive, deserve the warmest of welcomes, and that we feel certain, will be given to them—Brookville Record and Times.

Sojourns Make A Paste Of Pressed Milk That Has Curative Qualities

Soviet scientists have developed a paste of dried milk which is effective in curing wounds. In a Moscow hospital where several men whose wounds healed very slowly, novocaine bleeding, ultra violet ray treatment, and various other treatments, did not prove effective, granate baths not proving of much value. The special milk paste was applied and the wounded were soon well again. During the Leningrad blockade, this paste was used in all the Leningrad hospitals.

Ordinary straight pins are among the scariest articles in Holland today.

R.C.A.F. Sergeants Major In New Role

R.C.A.F. Photo when they were pressed into service as mess maids for youngsters of British War Brides who recently arrived in Canada.

Snapped by an R.C.A.F. photographer, the W.O.'s seem to be enjoying their job. They are left to right: standing, WO2 J. M. Mills, St. John, N.B.; WO2 J. E. Montgomery, Toronto. Seated: WO2 J. V. MacLellan, Montreal; WO2 G. C. Abbot, Camp Alice, Haney, B.C.; and WO2 R. L. Loveday, London, Ont.

Hard To Decide

What To Do About Channel Islanders British Problem

In a curious little backwash of the war lies the Channel Islands, the only British islands occupied by the Germans in this war.

The Channel Islands, with some 60,000 inhabitants, are a short distance off the coast of France, and have been occupied by Germany for more than four years ago. The collapse of France and its occupation by the Germans presented the British Government with a problem—whether to evacuate the islands or defend them, if so, were they of sufficient strategic value to justify the necessary expenditure of men, ships and material in the difficult circumstances.

The decision was to evacuate the troops, but most of the civilians had to be left to take chances with the enemy.

The Germans have occupied the islands since the beginning of four years. Now the situation has changed sharply. The Germans are cut off and can neither evacuate nor reinforce them. The islanders are not of the least strategic value to Germany. But there the Germans sit, 7,000 of them, according to a letter in the London Daily Telegraph—and the British public wonder what to do with them.

The difficulty is that if the Germans are starved out they will be sent to the last to suffer privations. The islanders, who will get scant consideration. The islands can be taken by assault, no doubt, but such an operation would be directed at British property.

The Daily Telegraph suggests that the British should not interfere with the islanders, who are not of great value in the defense of Germany, and he holds that it would be better to let them go home and risk the loss of 60,000 British men, women and children. From this distance there seems to be some point to the suggestion. Otago Journal.

Value Of Friends

Necessary For Our Continued Existence In The Future

We all depend upon the forest, where we are, for the natural guarantee of our existence as producers and consumers of the fruits of the earth. In the long run, if we don't conserve our forests we shall lose more than our forests.

In the short run, if we don't attend to conservation of our firs and pines and poplars, we shall make a desert which will not get a living thing to happen before the habitation of men and civilization.

They cut down their trees, more than they should have done, and made a desert of the wind blew the dust across the desert over all the monuments of their time on earth—Vancouver Province.

It is the volatile oil present in a cedar chest which kills moth larvae.

May Learn Secret

Tritips Is Salvaged Will Be Studied For Resistance Power

The Tritips was still intact after being twice torpedoed, once by the Russians and once by ourselves, and bombed at least half a dozen times and was not even partially battened than other sister ship, the Bismarck. The latter, it will be remembered, was an unconscionable time in sinking. Our naval construction experts will be requested to study Tritips, and see what she has been through. The Tritips will be scuttled to the seabed to the hubris of endless conversation, the tramping of many feet, the slamming of doors—and awake, at last, from fitful slumber, wishing the hotelkeeper had never been born or that he had chosen another birth.

It was different here. The hatch did not rattle, the door slowed down, the hatch was open. The roundouts looked restful. The lady at the desk was quiet and efficient. Yes, there was a reservation for me, room 14. The room was a place to be in, the carpet reflected by a rubber-like covering. I knew what I would find before I opened the door. The room was small but neat and clean. Everything was in its place. The lights were dimmed, the gas given off, it was likely to be a good night.

There was a chair beside the bed—a better place for a watch than under a pillow.

There was a place to lay your head, a stick to hold the window open. The ash tray contained neither stubs nor ashes. The Old Testament Bible was new, a half-moon cover. Perhaps only saints slept here.

Said I to myself: "Here's a hotel run by a man who has slept in a hotel, before he owned one. I wish that could be said of all hotelkeepers."

LUCKY CIVILIANS

The United States 3rd Army released a large quantity of captured food to civilians of Metz. The hasty was given the letters "G" and "G" and "G" to indicate that it came from popular American factories. O.W.I. reported that it's the Chinese who can't pronounce "R", while the Japs can't say "L".

Tobacco was once used by Indians in middle America as a medicine and as incense in religious ceremonies.

WHO SAYS WHAT

The office of war information says it isn't so that the Japanese cannot produce the letter "R". O.W.I. cannot say that it can't be popular American fallacy.

Motorist—Yes, officer, but I thought it was describing the village.

Butcher—Ticketed to London for the missus.

Booking Clerk—First or third, sir?

Passenger—Sh! She's the third, but I ain't never told her 'bout the others!

I told her that each hour with her was like a pearl to me."

"And did that impress her?"

"No. Sir! told me to kill stringing her."

Lady (at employment agency)—I want a good cook for my country place.

Manager—Miss Jones, have we anybody here who would like to spend a day or two in the country?

Entertainer—To his civilian friends his role is the artillery, a dusky soldier said:

"Ah opens de big gun, puts in a big shell, closes de gun, pulls de trigger, steps back and says: 'Mizan! Mizan!'"

"Your daughter has a great many suitors, but she is too young to marry," said Mrs. Billings.

"Oh, yes," replied Mrs. Billings, "she puts nearly all her widow curtains on the rods with her old engagement rings."

Mrs. Blow—How did you ever get a reference saying you were a perfect lady's maid?

Male—I worked for a perfect lady once.

"How many times shall I bow?" said the movie entertainer at the ballroom variety show.

"Bow?" said the stage manager.

"No bowing for you matey; you'll have to duck."

A yellow flag hanging from a ship's hayard indicates that there is pestilence aboard.

Look for "Miracle" Sow and Starter Supplement—the name "Miracle" assures you that every ingredient in the bag has been scientifically tested for food value. Mix "Miracle" Sow and Starter Supplement with your farm grains for the best results.

ASK FOR "MIRACLE" FEEDS

Comments On British Policy Regarding Italy

LONDON.—The Manchester Guardian is an informant described the United States state department's announcement of a hands-off policy concerning the Italian government as "a sharp snub" for the British government.

"It is a rude statement and it is meant to be rude," said the Guardian. ". . . the American papers of the last few days have shown very clearly that British prestige as a democratic power is running down."

Commenting on the announced British opposition to Count Sforza as prime minister of Italy, the Guardian said: "We are told that there may be in the United States about the genuineness of our democratic policy are shared in an even higher degree by our other great ally, Soviet Russia."

It urged the British government to "be desperately careful not to get into these positions," saying: "We simply cannot afford to make international blunders."

The London correspondent of the Yorkshire Post said: "The Washington declaration smacks of that self-righteousness from a distance which characterised United States policy in former times."

"The sentiments enunciated by the state department are admirable. But they are self-evident. Perhaps the British government has not yet come to their conclusions to Count Sforza in quite the most tactful manner. But why this chilly recital of the obvious from Washington?"

"Washington's reference to what should be done in liberated United Nations territories betrays a somewhat unfeeling attitude. It suggests that we need not only a sharp but leading role in the war. In advance. We believed that the liberated peoples should hold elections as soon as free and genuine elections can be held."

GERMAN BOMBERS

Operations Curtailed Owing To The Lack Of Fuel

ROMA.—Germany is suspending aerial bombing operations as a result of Allied bombing attacks on her refineries that some German pilot training centres have been closed down and the enemy's bomber force has been "practically abandoned," Lt.-Gen. Ira C. Eaker, Mediterranean air force commander said.

Gen. Eaker said the Ploesti oil field in Romania was the bloodiest air battlefield of the war, with the Americans losing 300 tons and 10 times that number of bombers, but he declared it was worth the cost.

When the attacks began, he said, the Germans were giving 26,000 tons of petroleum products daily to the Ploesti fields. Toward the end production was cut to 3,000 tons daily, of which the Nazis were able to get out only a small portion.

IN FULL COMMAND

Report Says Himmler Keeping Hitler Out Of Public Affairs

LONDON.—Indications have sprung out of Germany that Heinrich Himmler, 1. Nazi, during the current apparent eclipse of Adolf Hitler, has reached some sort of political-military truce with Germany's up-in-arms general.

One consideration in the reported truce was said to be that Himmler would keep Hitler under cover and make him keep his hands off military affairs.

Reports said Himmler was keeping Hitler in what amounted almost to confinement by over-emphasizing his poor health and filling him with fear of another attempt on his life if he came out of hiding.

NOT SUITABLE

Jeep As Farm Implement Has Been Rejected In West

VANCOUVER.—J. P. Gledhill of Toronto, chief of the consumers' goods division of the War Assets Corporation, has advised that provincial agricultural departments in the western provinces have rejected the Canadian type jeep as a possible farm implement.

The Mar. 1 jeep is unsatisfactory for farm work because of its low towing capacity of only 600 pounds and its low mileage rate for gasoline consumption.

Gen. Sir Oliver Leese, right, chatting with Lieut.-Gen. Pownall on his arrival in Ceylon. Gen. Leese, who is to take command of the 11th army group under Lord Louis Mountbatten, in succession to Gen. Sir George Gifford, was formerly in command of the British 8th army in Italy.

OIL SANDS

Major Progress In Extraction Of Oil From Mineral Sands

TORONTO.—Progress is being made with experiments in the extraction of oil from the mineral sands of Alberta, N. E. Tanner, minister of mines and mines in the province of Alberta, told a gathering of investment dealers, stock brokers and developers here.

Mr. Tanner reviewed the development of oil in the sand and pointed out that while production in the Turner Valley reached its peak in 1942 and was now on the decline, new fields gave promise of more than making up for the loss. Exploration has now been concentrated on a large scale in a half dozen fields, and to the north Abasand Oils Limited at McMurray and Oil Sands Limited, further north, are also taking a good grip of separating the oil from the sand. It was estimated, said the minister, that a ton of sand contained about one barrel of oil.

Reserve Army Will Continue After The War

OTTAWA.—Canada's home guard reserve army of 100,000 part-time volunteers will continue to play a major important role, whether performed in the years before the war and which it has so abundantly fulfilled during the anxious days of this war," the House of Commons was informed.

Navy Minister Macdonald, setting defense minister in the house, gave a record reply to a question by Gordon Graydon, Progressive Conservative leader.

Mr. Macdonald explained that the reserve army was the modern name of the post-war non-permanent active militia, which "is the framework of our national military organization in peace-time."

He continued:

"It is our present policy to let the continuation in the post-war period of the non-permanent active militia become the major portion of our military forces. The men who have gone from these reserve units and who now fill the ranks of the mobilized active units will return, and to the extent that the reserve army is kept alive, they and their units will find their military family association maintained so that there will be no break in the continuity of service and tradition of each regiment."

He concluded:

"It is our present policy to let the continuation in the post-war period of the non-permanent active militia become the major portion of our military forces. The men who have gone from these reserve units and who now fill the ranks of the mobilized active units will return, and to the extent that the reserve army is kept alive, they and their units will find their military family association maintained so that there will be no break in the continuity of service and tradition of each regiment."

LIVING COST UP

OTTAWA.—The federal bureau of statistics has revised its official cost-of-living index, calculated on the basis that 1935-39 equals 100, advanced from 118.6 at Oct. 2 to 118.9 at Nov. 1 for a wartime increase of 18 per cent.

Gen. Leese Takes Over Command

Lieut.-Gen. Sir Oliver Leese, right, chatting with Lieut.-Gen. Pownall on his arrival in Ceylon. Gen. Leese, who is to take command of the 11th army group under Lord Louis Mountbatten, in succession to Gen. Sir George Gifford, was formerly in command of the British 8th army in Italy.

Promoted

Lieut.-Col. Lawrence Edmund McCooey 48, Ottawa, who has been promoted from acting rank of major and appointed as special assistant to the chief of the general staff. He succeeds Col. H. C. Campbell, Ottawa, who was appointed military secretary to the minister of national defence, Col. McCooey is a permanent force soldier and resides at Ottawa, Ont.

INVESTIGATE TAXATION

OTTAWA.—The government investigating aspects of taxation are being organized in Ottawa. One headed by Mr. Justice Errol McDougall of Montreal, will investigate tax evasion. The other, headed by W. C. Ives, former chief justice of the trial division, supreme court of Alberta, will inquire into annuities and succession duties in respect to the revenue service.

Mr. Macdonald explained that the reserve army was the modern name of the post-war non-permanent active militia, which "is the framework of our national military organization in peace-time."

He continued:

"It is our present policy to let the continuation in the post-war period of the non-permanent active militia become the major portion of our military forces. The men who have gone from these reserve units and who now fill the ranks of the mobilized active units will return, and to the extent that the reserve army is kept alive, they and their units will find their military family association maintained so that there will be no break in the continuity of service and tradition of each regiment."

He concluded:

"It is our present policy to let the continuation in the post-war period of the non-permanent active militia become the major portion of our military forces. The men who have gone from these reserve units and who now fill the ranks of the mobilized active units will return, and to the extent that the reserve army is kept alive, they and their units will find their military family association maintained so that there will be no break in the continuity of service and tradition of each regiment."

SUPPLY OF WHEAT

Estimates Show Australia Harvested Smallest Crop In 25 Years

OTTAWA.—The Dominion bureau of statistics said few significant developments have taken place during the last month in the production of agricultural products of the four principal wheat exporting countries—the United States, Australia, Canada and Argentina.

The Australian crop, estimated for the beginning of harvesting operations at about 50,000,000 bushels, has proved to be the smallest crop in 25 years. Wheat stocks at the end of October were down to \$8,000,000,000, with the estimated requirements for feed and seed increasing as pastures suffered further deterioration.

Private estimates of the new Australian crop have been in the neighborhood of 200,000,000 bushels, which promises to add from 90,000,000 to 100,000,000 bushels to Argentina's exportable surplus. Argentine exports in November were 1,000,000 bushels and November 1,500,000 bushels.

The United States has added a record crop to an above-average year and although the prospective harvest is also large, it is also possible to export up to 100,000,000 bushels of wheat in 1944-45 without materially reducing the carry-over of 315,000,000 bushels held at the end of 1943.

Canada's surplus over and above domestic requirements is considerably larger than that of any of the other three principal wheat exporting countries. Total available stocks of wheat in Canada after probable domestic requirements have been deducted, exceed 648,000,000 bushels for the current crop year.

MADAME RUSE DEFIED GESTAPO

Story Of A Belgian Woman Who Helped The Underground Press

Some day the whole story of the part played in the underground press by Madame Ruse will be told, but of it which does not lie unknown in those anonymous graves so hastily filled by Nazi reprisals.

Many of the victims in the graves are now completely buried with resistance secrets locked within their minds. Some were reacted by patriots before the final shot was fired. Madame Ruse was one of these. She had been living in hiding for a whole series of months in most impudent and brazen underground papers. *Libre Belgique*. The correspondents gave her their copy. They knew her not even in a cafe, now as if they had never seen a counter, again in a park or street.

The usual articles were written by hand. Mme. Ruse typed them on a machine hidden in her house. Then she gave them to the editorial staff of the paper, then to the typographer and to the printer.

The Gestapo was always hot on the track of *Libre Belgique* and the paper was printed in the same place two days in succession. One man was more constantly exposed to danger than she was and no one was so well acquainted with the intricacies of getting the paper out as she was. So it was that Mme. Ruse was arrested. She was first interrogated without being made to suffer too much. But she was given to understand that it would be much worse the next time.

During the seeming questioning she was beaten with a rubber hose. The policemen struck her in the face with their fists. Pointed wooden sticks were inserted under her nail beds until she screamed. She did not speak.

She was thus questioned and tortured to the limit of physical endurance eighteen times. Eighteen times she braved the brutal sadism of these brutes. But she did not speak. She never did.

Eventually she was crammed into a train, along with 2,000 other people to be taken to Germany. But the Belgian railway workers were on the lookout and managed to stop the train, while days were to cover the distance of about 20 miles. The unfortunate prisoners were brought back to Brussels, and the advance of the liberators found them there.

A drawing room before the war, young and lovely Mme. Ruse is now a broken white-haired woman but she has brought comfort and courage to tens of thousands of Belgians for whom the only truthful voice of her paper was their only support in years that were as dark as human beings have ever endured.

Japanese Atrocities

Determined To Mete Out Punishment For Those Responsible

The Japanese government has formally accused the Japanese military of torturing and murdering Australian service men and civilians of New Guinea and declared that every possible step will be taken to track down and punish the responsible parties.

Evidence of Japanese atrocities, compiled after an investigation lasting nearly a year, will be presented to London by delegation by the United Nations War Crimes Commission. Attorney General Herbert Evatt told the House of Representatives.

Evatt said the investigation had uncovered proof that the Japanese massacred tortured and maltreated New Guinea natives as well as Australian nationals during their occupation of the island. No specific instances of the atrocities charged to the Japanese were cited.

Sir William Webb, Chief Justice of Queensland, who directed the investigation, will present to London shortly to present selected cases of cases before the Allied Commission. Evatt said.

He asserted that national courts could not adequately deal with some of the atrocity cases because ordinary court rules and procedure might not be adaptable to the extra ordinary circumstances under which the trials must be held.

Evatt made it clear, however, that the government is determined to leave nothing undone to insure the punishment of the Japanese responsible for these atrocities.

During the late glacial period, 15,000 to 25,000 years ago, Alaska was without ice, although glaciers covered most of North America.

The term ruber came into popular use in 1770 when an English artist observed the substance's capacity to erase pencil marks.

The Name Of Churchill

Means Much To Practically Every Country In The World

When the British press extended warm greetings to Prime Minister Churchill on his 70th birthday, the papers stressed they were voicing the feelings of the century and the friends of freedom throughout the world.

As the Times of London phrased it, "The name of Churchill means half as much to practically every country in the world as any true national leader; not only in his appeal to the popular imagination and in the control of strategy but also in his mastery of the political situation."

"Along with enduring youthfulness, disarming humor and essential distaste of pretension and parade has come with an increasing sense of an ever-increasing maturity of patience and tolerance which supply the reason why the loyalty of his colleagues in an all-party government has roots which go into something deeper even than personal and paramount duty of the hour."

The Manchester Guardian said: "No British name has ever meant so much to men and women under every sky."

"Mr. Churchill was a greater man and spoke with a greater power when he took control of our fortunes because he had spoken those lonely hours before the war, when he was younger and thinking only of the fate of his country and of Europe. All the force of his character disciplined by adversity and strengthened by the strength of his talents were absorbed in his task of leadership."

"Whatever the future, that awaits him, he has lived his finest hours."

Better Than Carrots

C.A.C. Medical Officer Says Oranges Improve Seeing At Night

There would appear to be the interesting possibility in the discovery made by a high ranking member of the Canadian Air Force concerning the usefulness of oranges in improving the power of seeing at night. It is not known exactly what he or his colleagues were doing during the tull of the roads.

So it seems possible that what is now the ominous phrase "one for the road" may take on a new significance and meaning at least in the event an evening's entertainment may have changes served to all who are able to drive cars. Public houses might do well to offer oranges for the benefit of customers.

Others, drivers of lorries might have a statutory obligation to keep them supplied with oranges and we may yet see some change on the tank superiors' oranges instead of carrots.

It is true that difficult problems are involved in the event of such a shortage of oranges as we have had in the last five years. It would be an impossible task to decide whether it were better to let the children have the oranges in order to build up their strength or to give them to drivers of vehicles in order to save, potentially at least, the lives of the children from being cut short.—Manchester Guardian.

Market For Beef

Producers Are Assured Of Demand

Export In 1945 For 1946

Producers of beef in Canada are assured of a market for all surplus beef in Britain for the year 1945, states Hon. James G. Gardiner, Dominion Minister of Agriculture. He was referring to the statement made by Prime Minister Churchill on November 15th by the Minister of Food, to the effect that Canada will supply a minimum of 100,000,000 lbs. of meat in 1945 and that the United Kingdom will purchase a maximum of 112,000,000 lbs. in 1944. 134,000,000 lbs. in 1945, and be glad to take additional amounts of available.

Mr. Gardiner explained: "It has been the policy of the Dominion Government since early in the war to have a clause in the agreements with Britain read 'not less than' given British requirements." The beef agreement was the first departure from this in that a maximum as well as a minimum was set. The statement made by Colonel Lincoln removes this clause. The statement further effect says to Canadian producers there is a market in Britain for all surplus beef for the year 1945."

ARMY SURGICAL UNITS

Major Angus McLachlin, St. Thomas Rhodes scholar who recently returned from overseas to become head of the surgery department at the University of Western Ontario, has just announced that the Canadian Army Mobile Surgical units in use in France, Belgium and Holland are the best equipped on the Western Front.

The tips of a propeller moving at top speed often surpass the speed of sound.

Good Canadians... Three

The Recruiting Officer in Winnipeg got the surprise of his life when this trio walked in and asked to enlist, to serve anywhere. Theirs is in China. They have not seen her since outbreak of war. And they are determined to find her so they enlisted to fight either Jap or Hun. Sons of Henry Lee, restaurant owner of Souris, Man., they left today. Albie Jimmie and Willie. The three Chinese-Canadians enlisted the same day, when they were "old enough to fight," they explained. And they took it the hard way . . . Infantry.

Livestock Farming

Is Being Increased In All Provinces

For Current Year

Hon. Duncan Marshall, Ontario's minister of agriculture, says Ontario's cattle population is now placed at 10,346,000, slightly over 10 per cent more than a year ago.

He adds the province now 2,744,000 head of which 1,187,600 are milk cows.

Albeit leads in pigs and sheep, having a little over a million sheep and 2,000,000 pigs. Ontario is second with 1,800,000 pigs and 757,000 sheep. All the provinces in Canada are getting their feet firmly set in livestock farming. Ontario is first place with 26 million hens and chickens, Saskatchewan being second with 19½ million. We are not likely to go short on milk, meat, eggs and wool and kindred products. This should be sound business if the world's people are to be offered freedom from want.

Nearly half of all pedestrian deaths occur away from regular crosswalks.

The turnip was cultivated in England in 1724.

Shorthorn is seen in Eastern Canada.

It is estimated that in Eastern Canada there is not enough alfalfa seed to provide the normal planting requirements needed to maintain maximum production of meats, dairy and poultry products, the Agricultural Board says.

Western Canada has surplus alfalfa seed, but as its normal market is in the U.S.A. the seed is purchased from growers at a price which does not permit payment of the freight on shipments to Eastern Canada and distribution there within the retail ceiling price of \$37 per 100 lb., said the Board.

VALUE OF ADVERTISING

Everyone must know his own home needs and judicious advertising is the great horn that enables many to make themselves heard in the din of competition.

Half of all pedestrian deaths occur away from regular crosswalks.

Puzzle To Scientists

None Of Them Know Where The End Of Space Is

Sir Arthur Eddington, English astron-

omer, dead at 61, was a student

of a subject about which little is

known in the layman's mind,

which is astronomy, physics and

mathematics are seldom in agree-

ment, the nature of the universe.

One of Sir Arthur's beliefs was that

the universe is finite and bound-

ed, and that it would be no more

points to support his theory. But it

is the strange nature of the celestial

field he plowed that the same points

could be used to disprove his con-

tention.

Not Sir Arthur, but Einstein, not

any man before or after Coperni-

cus or Galileo, has got close to the

answer, and all the questions: "Where is the end of space?"

Astronomy is the least mundane

of the sciences and one of its val-

ues is the profit it affords of how

little profound scientists know

about the stars.

Searching For Snipers In Geilenkirchen, Germany

Three Allied infantrymen advance on a house suspected of being a snipers' nest during the mop-up operations in Geilenkirchen, Germany. The town was taken in a brilliant joint action by the British Second Army and the U.S. Ninth.

HOLLANDER SAW V-2 BOMB LAUNCHED

Dutch Clerk Tells About Germany's New Arial Weapon

From a grandstand seat on the roof of a house in Ryewyk, near The Hague, a Dutch clerk watched the German Nazis launching their new aerial weapon, V-2 against England.

The Germans chose a spot about a quarter of a mile from the Holander's grandstand seat at the site of the next launching. By 8:30 PM houses near the site were cleared of their tenants. The area around was under SS guard. But the young Dutchman sat up in his house and waited. For nights he kept his vigil, with his heels hooked in the caves.

Then, on the evening of Oct. 22, there was a tremendous roar from the launching site, like a gigantic cannon being fired. The town of Ryewyk was bathed in a weird red and white light. A projectile shot up into the air and disappeared like a spark from a fint. The people of Ryewyk panicked.

After V-2 had been launched for several days, all the trees around the launching site, like the buildings were blazed, as though they had been burned. Right night he watched the launching. He thinks now the V-2 was actually launched from a distance of about 100 yards from the town.

It is estimated that in Eastern Canada there is not enough alfalfa seed to provide the normal planting requirements needed to maintain maximum production of meats, dairy and poultry products, the Agricultural Board says.

Western Canada has surplus alfalfa seed, but as its normal market is in the U.S.A. the seed is purchased from growers at a price which does not permit payment of the freight on shipments to Eastern Canada and distribution there within the retail ceiling price of \$37 per 100 lb., said the Board.

The new order prohibits any person from charging or demanding payment of a commission or reward from a tenant or from a subtenant or from a third party for services rendered.

To prevent exploitation of tenants through the sale of furniture or excessive rentals, the order prohibits any agent, broker, factor or other person from charging or demanding payment for a tenant or for the furniture has been set by the lessor.

The order also provides against any new racketeering practice by giving the rents administrator authority to issue special directions if "unreasonable or unjust" conditions are imposed on a tenant.

GEMS OF THOUGHT

TIME
There are no fragments so precious as those of time, and none are so heedlessly cast by people who cannot make a moment, and yet can waste years.

Rejoice for time is good, and the time that remains. And the time that remains is time enough, if we will only stop the waste and the idle, unless regretting.—Arthur Brisbane.

Time past and time present, both, may pass us, but time improved is eloquent in God's praise.—Mary Baker Eddy.

In time there is no present, In eternity no future.

In eternity no past.—Tennyson.

Dear Land to which Desire for ever

feels allow;

Time doth no present to our grasp seize;

Say in the fix'd Eternal shall we seize

At last the setting Now?

—John Dryden—Lyton

Beloved, be not ignorant of one thing, that one day is with the Lord as a thousand years, and a thousand years as one day.—II Peter 3:8.

THE REAL MENACE

What's little, or is, or is in the clutch of madness doesn't matter. The foul thing he spawned still lives and menaces the world. Nazism remains just as black when headed by Hitler as it does when headed by Mussolini or Goebbels as by Hitler. It is not a stain if humanity is to enjoy peace and security.

TIFF FOR JAP FLEET
To hold off the Japanese advancing boldly in retreat, the clever Japanese could fit their navy with a front on either end, like ferry boats.

A tire on a wheel which is only half inch out of alignment is dragged sideways 87 feet every mile the car travels.

History Of The Science Of Horticulture In Canada Is Traced From Earliest Times

IN A REVIEW of Canadian Horticulture, M. B. Davis, Dominion Horticulturalist at the recent meeting in Winnipeg of the Western Canadian Society of Horticulture, traced the history of the science in Canada from the time of the Indians, through the era of European settlement and the arrival of the Loyalists, to the present era into which Canada has but recently entered.

The Indians grew pumpkins, and beans under a system of cultivation, and the still familiar Squaw corn has been employed both as a variety and as a parent in plant breeding. As the pumpkin has never been found in a truly wild state, said Mr. Davis, credit could be ascribed to the Indians for its introduction into North America, notwithstanding the fact that it was known in Europe.

The second era of Canadian horticulture—that of the European settler, commencing with the French—was the real beginning of an attempt to develop a horticulture in Canada. As early as 1653, it was recorded that apples were being cultivated close to what is now Annapolis Royal, Nova Scotia, and some of the varieties grown at that time is in existence today. From the efforts, however, of the French settlers has come one variety of apple, the Fransoise, apparently originating from seed brought over from France.

The next stage of the development of Canadian horticulture came after the American Revolution when Loyalists came to Canada in considerable numbers and brought with them either the materials or knowledge that led to a rapid development of the fruit industry in Eastern Canada. Coming at the same time, the advent of the Provincial Experimental Farms in 1858 was one of the prominent features in the development of the science. Fruit breeding was undertaken at the start, but prior to that the first director of the Farms, Dr. William Saunders, had already originated a line of black currants which are today the leading horticultural product of our government, such as Silver and Jasmin, which have become standard sorts. He also brought Brighton and Count raspberries, which up to recent years have been the standard early sorts.

Thus at the Central Experimental Farm in Ottawa, fruit breeding was easily established, both to provide better varieties and to develop new fruit areas of Eastern Canada and for the Prairie Provinces. In 1898 Dr. Macoun of the Division of Horticulture developed an apple breeding program to combat the blight of horticultural varieties covering the seasons from late summer to late winter. Other landmarks in Canadian Horticulture were the establishment of forestry stations in 1893 and 1914, the Central Experimental Station at Morden, Man., in 1918, followed by what has not been done before, the growing of all kinds of fruit in the Prairie Provinces. During the advance of World War I, Canada was entirely dependent upon Europe for its vegetable seed supply. Now Canada is an exporter of vegetable seeds.

In the field of plant culture and nutrition, progress has been achieved, and Canada has made a noted contribution to the recognition of plant food, excretion and diseases and in the field of fruit and vegetable products, along the lines of original Canadian effort, canned fruit juices were developed; dried fruit of many kinds were developed; a high-class hydrolyzed protein, and a Canadian processed cherry industry was originated and developed; white wine was distilled from Canadian cider vinegars, and a result of Canadian research a vinegar industry was established in dehydrated vegetables and fruits.

Getting Around It

German Farmers Have Way Of Beating Stern Nazi Decree

Owing to the shortage of fodder in Germany, a stern Nazi decree has just been issued requiring every hen to lay at least 70 eggs a month. The official order has caused considerable consternation in the henyards of the Fatherland, for Section 2 of the decree states that if the egg production falls below the necessary total of 70, the hen-owner will suffer unpleasant consequences. Our own Home Intelligence Department reports that the German Army may change in the matter, roast chicken, fried chicken, and chicken fricassées are becoming increasingly frequent items on the German farmers' menu.—Christian Science Monitor.

In France, around 1481, a person convicted of selling bad eggs was placed on the pillory, and the eggs were given to children to throw at him.

Red Cross Parcels

Food From Canadian Farms For Prisoners Of War

By arrangement with the British Red Cross Society, the Canadian Red Cross Society supplies two-thirds of all the food parcels sent to allied prisoners of war, except those from the United States. Clothing and other supplies, Canadian and other, and other allied prisoners are supplied by the British Red Cross. Much of the food in the parcels originates in Canadian farms.

A total of 100,000 parcels are sent from Canada to prisoners of war every week. This year the cost will be, it is estimated, \$21,700,000, of which the Canadian Red Cross will go to \$9,000 British and Canadian prisoners of war in Europe, \$0,000 for other allied prisoners in Europe, 30,000 for British prisoners and civilians in Asia.

The parcels are not sent individually to prisoners, but are distributed by the International Committee in Geneva, Switzerland.

The food in the parcels supplement the prisoners' diet. Each parcel weighs 11 pounds and contains:

16 oz	whole milk powder
6 "	butter
4 "	cheese
4 "	carrots or marmalade
10 "	pork luncheon meat
8 "	salmon
4 "	sardines or kippers
8 "	ramsons
4 "	fresh prunes
8 "	sugar
12 "	corned beef or other meat
16 "	pot biscuits
1 "	salt and pepper
4 "	soap
8 "	eating chocolate

In the first ten months of 1944 the Canadian Red Cross had sent 13,797,974 parcels.

Duck Population In Prairie Provinces Has Increased

Duck population in the Prairie Provinces and the Northwest Territories increased from 30,000,000 in 1930 to 140,000,000 in 1937, Capt. G. Man of Winnipeg, general manager of Ducks Unlimited, said in an interview at Edmonton recently. Figures were used on the census reports from 2,000 key men.

Airplanes: they have no speed indicators, which record the speed of a plane relative to the air.

The condition among coons known as "salt kick" has been found to be caused by a deficiency of copper and iron in the diet.

PREPARE FOR NEXT YEAR

Preparation for next year's crop should include a seed test.
Have a germination test made on your seed. **NOW!**

Our Agricultural Department make such tests free of charge.
If you have an agricultural or marketing problem consult our
agent who will refer it to us for consideration and advice.

**PIONEER GRAIN COMPANY
LIMITED**

**Drumheller Municipal Hospital****Sale of Special Contracts**

The Board of the Drumheller Municipal Hospital District No. 3 announces that special contracts will be sold to those nonratepayers resident within the boundaries of the hospital district, who do not obtain services at \$1.00 per month rate and reduced rates for special services for themselves and their dependents at the hospital in Drumheller. Sale of these contracts will begin immediately and will continue until December 31, 1944. These contracts will be effective January 1, 1945. Contracts may be purchased at the business office at the hospital in Drumheller for the sum of \$10.00. Any further particulars desired may be obtained from the undersigned.

Residents of township 28, range 23, may provide for the inclusion of that area in the Drumheller hospital district by signing a petition to be presented to the Honourable Minister of Health. If 65% of the resident ratepayers sign this petition the Minister may order its inclusion in the hospital district without a vote. The petition will be in the hands of Mr. S. F. Torrance of Carbon.

Mrs. Ed Harrison, of Drum-
heller, along with her son, Don-
ald and his wife, Mrs. Rob't. Barber

Mr. and Mrs. Garrett and fam-
ily spent the weekend at the
Edmonton and Poplar Grove Ranches,

We understand Charlie Tighe
has bought a new home in Vic-
toria, and he and his sister, Mrs.
Mabel Elliott, will move into it
shortly.

Mr. and Mrs. Gerald James
were Carbon visitors on Friday
and Saturday of last week. Mr.
John Atkinson had charge of the
yard.

Four first prizes and five sec-
onds on bronze turtles were
captured by Mrs. H. O. Young of
Grange, at the Edmonton Poul-
try Show in Wednesday's judg-
ing.

The Red & White store won't
be a few days last week
when the heating apparatus failed
them. The disunity was taken
care of on Friday, however,
and everything is again OK.

Mrs. Chas. Graham went to
Calgary last week to meet her
son, who is serving overseas
and on Wednesday from Ajax, Ont.,
where she is employed at a munition
factory. She will spend several
weeks at her home here.

Keep the evening of December
25th and New Year's Eve open
in order to take in the dances
which are being sponsored by the
L.O.D.E., and will be held at the
Scout Hall. For further par-
ticulars, see the advertisement
which appears on another column.

The Carbon School will put on its
first Christmas pageant this Thun-
day, December 21, at the Scout
Hall at 8:30 p.m. sharp. A good
program of recitations, songs,
dances and a Christmas pageant
will round out an enjoyable even-
ing's entertainment for young
and old. Come along and have a
good time.

honoring a very much feted
but deceased member, a local
show will be held Thursday No-
vember 23rd, for Miss
Ida Ward, at the home of Mrs.
W. D. MacDonald, of Grange.

The afternoon entertainment
included participation in several
interesting contests and an ap-
preciation of talent offered by
members of the younger set.

The Misses Readie and Lily
Bertson sang a lovely duet.
The selections, both classical
and popular were rendered by
Miss Jean MacDonald.

The climax of the afternoon
came when a scale replica of
Rocky Mountain was drawn in
pencil to the roof, with lovely
gifts for Miss Ward.

Explanations of admiration
were heard throughout the open-
ing of the gifts.

A tasty meal was served at
the close of the afternoon, after
which the guests departed for
their respective homes.
